

# PLAYport HD

**Full HD video, complex screen solutions and high performance – PLAYport HD is a media player that exceeds all expectations.**

PLAYport HD is a really powerful media player. Even though it is small and flexible it manages video in full HD without any problem. It can also handle designs with up to 12 different screen areas, which enables advanced solutions topped with profiling graphical elements.

PLAYport HD also supports images, web objects, PDF files, Office documents and QUICKnotes for fast publishing.

With PLAYport HD you will get full flexibility to publish just the way you want.
